Silver Oak College Of Engineering And Technology Grade: **9 SPI**

2019- 2023

Ahmedabad, India

Professional Experience

Skylllect Pvt Ltd

Full Stack Developer

Sep 2024 - Present

Surat, India

Snoball

- Developed Snoball, a SQL-based platform for managing digital and branding events, allowing project admin to create multiple engagement campaigns for each event.
- Implemented features in Snoball for campaign management, including customizable landing pages, social media sharing, email marketing, and performance analytics to optimize event success.
- Campaigns in Snoball synchronize with third-party influencers, enabling manual creation and user registration through shared campaign pages to boost event engagement.
- Developed real-time update features using Socket.IO, ensured secure document storage on AWS S3

Techivies Solution Pvt Ltd

Full Stack Developer

June 2023 - Aug 2024

Ahmedabad, India

Payright Home Care (TPP)

- Developed and implemented a secure mediator platform that connects patients with caregivers and streamlines the management of service charges, integrating advanced encryption techniques and payment gateway systems to facilitate transactions and insurance settlements.
- Integrated Priority Passport payment gateway and wallet system into the project to streamline transaction management and settlement.

- Integrated Priory Passport payment gateway and wallet system into the project to streamline transaction management and settlement.
- The platform produces financial reports for administrative analysis, handles invoice generation, and automates email delivery to clients and companies to facilitate efficient insurance settlements.

Knowsys

- Developed an interactive platform with separate admin and student panels, enabling students to take tests and receive automated progress reports for competitive exam preparation.
- Integrated CKEditor into KnowSys to allow admins to create versatile test papers with rich formatting and images, enhancing the assessment experience for both admins and students during exams.
- Implemented an analytics system within KnowSys that evaluates student performance, generating detailed progress reports to identify skill gaps and guide targeted improvements for competitive exam.

E-tab

- Built a project from the scratch that lets users register their wallet addresses with custom domain names for a small gas fee.
- Created a system that links easy-to-read names (e.g., 'alice.eth') to machine-readable identifiers such as Ethereum addresses, other cryptocurrency addresses, content hashes, and metadata.

Prisma

- Developed Prisma, an integrated platform that connects homeowners and renters, offering comprehensive services such as rental payment processing, customizable rental agreements, and maintenance request management to enhance the overall rental experience.

Techivies Solution Pvt Ltd

Dec 2022 - June 2023

Jr. Full Stack Developer

Ahmedabad, India

- Designed and developed modules for a **Ecommerce Website** using Angular in the MEAN Stack. Responsibilities included creating the add to cart, product details, payment integration functionalities bug fixing, and translating the project into another language using a boilerplate.
- The Socket.io Connection establishes in the CRM system for internal communication and also creates a chatbot as a customer service representative.
The other one was the **Home Care Website** where I Integrate Kendo UI and lazy loading with responsive
- Admin Panel, ensuring compatibility across devices.

Other

ETHGlobal India Hackathon

Alverse NFT

- Designed and developed applications, where user can mint their NFT by just entering the custom prompt and mint them

ETHGlobal India Hackathon

TokenizeAI

- Awarded \$600 for implementing a token-based system, praised for optimizing resource allocation in subscription models.
